

# 4-Poster Test System

Team Corporation's unique Four Poster System is designed specifically for full vehicle testing. Featuring low-profile, low-noise actuators equipped with hydrostatic bearings, Team Four Posters are ideally suited to end-of-line and development testing applications. Our compact actuator modules are ideal for smaller laboratories.

Available in a range of load capacities and fixed or adjustable wheelbase configurations suitable for passenger cars through light trucks, Team's four Poster Systems are as flexible as they are economical. When separated, each actuator module can be used as a stand-alone vertical vibration test system.

## Features:

- Configurations for passenger cars and light trucks
- Low-profile actuator design
- Hydrostatic bearings for high moment capacity and long life
- Numerous control configurations
- Independently controlled actuator motion
- Compact footprint for each individual actuator

## Applications:

- Squeak & Rattle testing of full vehicles
- End-of-line Squeak & Rattle testing Reproduction of test track data
- Vehicle durability testing
